SUMMARY

Recent Computer Science graduate with expertise in C, C++, and Python, and a strong foundation in data structures and algorithms. Quick Learner and Adaptable. Highly motivated, detail-oriented, and eager to contribute and grow in a dynamic team environment.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, JavaScript
- **Data Structures & Algorithms:** Arrays, Strings , Stack , Linked List
- **Object-Oriented Programming (OOP):** Principles and applications
- **Web Development:** HTML, CSS
- **Tools & Technologies:** Git, Visual Studio, VS Code, Linux, Azure Cloud
- **DBMS - SQL Server**

RELEVANT COURSEWORK

- Data Structures
- OOPs
- Compiler Design
- Software Development
- Database Management
- Operating System

PROJECTS

Height Estimation System

- Designed and implemented an algorithm to detect and estimate the height of objects in images.
- Utilized OpenCV for image processing, including edge detection, contour finding, and perspective transformation.
- Developed a calibration method to map pixel measurements to real-world units using reference objects.
- Implemented a graphical user interface (GUI) to allow users to upload images and view height estimations.

E-Shop

- Developed back-end RESTful APIs using Node.js and Express to handle user authentication, product management, and order processing.
- Integrated MongoDB as the database to store user data, product details, and order histories.
- Used HTML , CSS to create frond-end of website.

CERTIFICATIONS

- Generative AI | LinkedIn Learning
- Microsoft Azure | Great Learning

EDUCATION

Bachelor of Technology in Computer Science

July 2020 - July 2024

University of Engineering and Technology

- Working on Projects and gain relevant skills .
- Relevant coursework in Computer Science and Engineering.
